Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-36, drawn to a process for producing legume products, classified in class 426.
- II. Claims 37-61, drawn to another process for producing legume products, classified in class 426.

Inventions I and II are unrelated independent because the method claimed in Invention I is different from the method claimed in Invention II. The processing steps are different in the two methods claimed. The method of Invention II does not require the steps of cooking in continuous advanced flight pressure vessel, blanching in continuous advanced flight rotary drum blancher and decompressing in a hydrostatic loop of Invention I.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or versa, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
